SUMMARY

Junior Frontend Developer, designing and developing responsive web applications using modern techniques and tools. Delivers clean user interfaces with smooth user experience, helping solve digital problems through effective technical solutions.

EDUCATION

Bachelor's Degree in Accounting — Oct 2022 - Aug 2026
Cairo University, Egypt

PROJECTS

Musnad Platform

- Musnad is a medical platform that connects surplus medicine with patients, improving access to essential treatment.
- Designed role-based dashboards for admins, medical entities, and clients to manage and request more efficiently.
- Integrated a chatbot for medical guidance and an SOS section to support urgent medicine requests during emergencies.

Personal Portfolio

- Designed a personal portfolio website to showcase skills, projects, and professional expertise.
- Built multiple sections including an integrated contact form using the EmailJS API for direct email communication.

E-Commerce Product Page

- Built a single-page e-commerce product view showcasing a specific product with multiple interactive features.
- Implemented a lightbox gallery for product views, along with checkout notifications and a receipt generated upon purchase.
